

DID YOU KNOW...

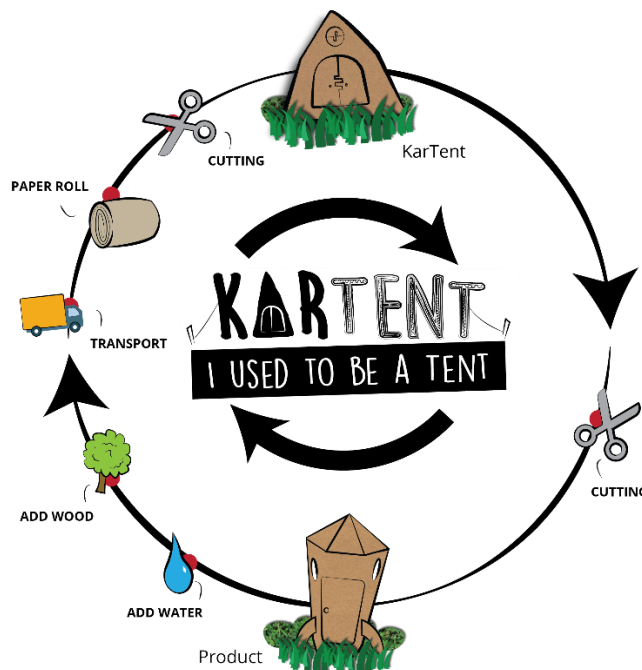

.... KarTent started in the festival industry? Many people left their plastic tents behind on festivalcampings and we decided to do something about that! Over 50.000 festival visitors at more than 500 festivals slept in a KarTent!

... Many cardboard products used to be such tents? The current product line originated from this! All products in the webshop are made of recycled cardboard. We purchased a big CNC (cutting) machine that creates new products out of recycled cardboard.

... We can create almost anything for you, from a closet underneath the staircase to a crib for your little one, you name it, we create it! Check www.KarTent.com/custom for more information!

We would love to see how the cardboard products shine in your house!
